

Wood Coating Machine

Wood Coatings are basically a kind of machine in which material is to be applied on wooden surface to protect the wood from different natural and manmade factors. These factors also include all the environmental agents which can cause harm to the wood. In simple words, Wood coating Machine's act as a life guard to any wooden item. Wood coatings can be applied to any kind of wood such as outside and boards, frameworks, garden furniture and street furniture, modern furniture, reproduction furniture, kitchens, doors, furnishing accessories, traditional flooring. Wood coatings make wood easier to clean, and keep it sanitized. It also helps in sealing pores that can be breeding grounds for bacteria. This machine helps in wood finishing that gives wooden surfaces a desirable appearance. Wood coatings are also capable of creating wooden designs as per our wish.

- Suitable for base/top paint coating for the panel furniture, flooring, cabinet, walling, artwork, bamboo window curtain, fiber cement board, calcium silicate board, glass magnesium board etc.
- Compatible with materials like solid wood/MDF/plastic/metal/glass/CaSi and so on. Ensure smooth surface with plump color and zero chromatic difference.
- Work as high precise primer, finishing roller coating or staining. To guarantee the best precision and stability, the roller coater and the electronic roller and the conveyor are independently controlled by separate motor, reducer, and frequency.
- Easy to change the roller with the casting design.
- PLC, automatic elevator, separate electronic box are available by choice.
